

JAN-PRO®

Measurable Cleaning. Guaranteed Results.®

Re-Opening With Confidence

In light of the current COVID-19 pandemic, JAN-PRO of Columbus has additional capabilities and resources to assist business in the region. JAN-PRO has already been an industry leader for decades in providing quality cleaning services, utilizing innovative technology and best practices that their franchisees use as a part of their branded system to help keep facilities clean and healthy. With business remaining open as essential, re-opening in part or preparing to do so in the next few days, a heightened awareness of cleaning and disinfection protocols has become widely embraced and in demand.

EnviroShield® at Work

Only JAN-PRO has the EnviroShield® total disinfecting system that:

- Fully covers all treated surfaces to kill more than 99.9% of harmful bacteria
- Won't cause skin, eye, or respiratory problems
- Is EPA-approved for safety, effectiveness, and eco-friendliness
- Cleans areas other systems can't reach

At JAN-PRO, we mean clean.

JAN-PRO is proud to offer their Enviroshield® disinfection service. This innovative disinfection technology is designed to kill covid-19 and other microorganisms using an EPA registered disinfectant solution in combination with an electrostatic spraying component. This system delivers a highly effective biocide that adheres to all surfaces including walls, ceilings, carpeted surfaces, keyboards, furnishings and even penetrating into nooks and crevices. The EnviroShield® system has 75 times greater force of attraction than gravity thereby enabling the disinfecting solution to wrap around and coat all objects completely. While it is the most comprehensive system for killing microorganisms, including Covid-19, the EnviroShield® system is completely safe for all occupants and is rated at level 4 toxicity on the EPA scale, making it one of the safest disinfecting solutions worldwide. It has latent effects up to 48 hrs. As an add-on service, Endure® can also be applied, which provides an antimicrobial barrier for up to 6 months on all sprayed surfaces. Both services require the facility to be vacant during application; however can be re-opened immediately after completion. JAN-PRO can provide this service either proactively or in response if needed. Contact Nathan.calhoun@jan-pro.com for pricing.

JAN-PRO has also worked to procure sufficient stock of liquid hand sanitizer in 2 liter bottles for public sale. Much in demand, current state guidelines and best practices require hand sanitizers throughout workplaces and business for both employees and customer usage. With traditional consumable supply resources strained, this alternative source can be used to refill existing pump dispensers as needed. JAN-PRO is making these bottles either individually at \$49.00 per bottle or by the case for sale and pickup from their Gahanna office. Contact Allison.martin@jan-pro.com for sale information.

Finally, JAN-PRO views their customers as their partners in business. With the additional challenges and risks of operating in today's environment it can be overwhelming very quickly. That is why they have made available a free 38 point checklist to assist with best practices for your staff and facility when re-opening. This free checklist can be accessed via a trusted download from <https://drive.google.com/open?id=1UaZ78ZDSW4C1we4ytniOdb8N3AaP4KQI>

Preparing to Reopen for Business

As you work towards reopening your business, there are a number of things to consider so that your employees and customers feel more at ease with their environment. Consider these operational guiding principles to help you navigate reopening.

1

2

3

4

5

Prepare Your Facility

- Ensure the integrity and accuracy of the HVAC filtration system and distributed flow fans, handrails, floor mats, windows, etc.
- Check for mold and moisture
- Check heating and air conditioning filters (if the HVAC system circulates air)
- Check water systems (sinks, shower, drains, showers, drinking fountains, water cooler)
- Check carpet and upholstery cleanliness
- Remove community food and beverage and consider replacing any single serving items
- Check for ventilation or duct
- Check food and chemical expiration dates
- Clean and disinfect breakrooms, restrooms, office area, conference, lobby, bathroom, handles, trash cans, etc.
- Consider how to work plan with visitors
- Check your fire exit lights, extinguishers and smoke detectors
- Ensure all inspections, reports and employee communications are complete before reopening

Prepare Your Employees

- Confirm employee health and readiness to return to work
- Mitigate any anxiety of returning to work through new guidelines and practices, for example with each individual
- Send work schedules early and consider staggered entry
- Educate employees on social distancing, handwashing and other safety practices
- Develop a detailed plan on what to expect when coming back to work
- Create a schedule of social distancing and proper hygiene practices around the facility

Create Social Distancing Guidelines

- Ensure conference rooms contain proper amount of seating with at least 6 feet in between each other
- Convert small rooms to single occupant use only
- Add panels or partitions between desks and team concept areas
- Establish flow traffic direction in main circulation areas
- Consider more virtual meetings

Increase Cleaning and Disinfecting

- Clean and disinfect frequently touched surfaces (per a daily basis including tables, countertops, light switches, handrails, handles, desks, phones, keyboards, toilets, faucets and sinks)
- Replace carpet commercial cleaning policy and service and prepare for increasing frequency
- Consider low or non-touch switches, doors, showers, trash cans, appliances, etc.
- Remove community beds such as unattended strollers, service carts, umbrellas, aprons, handbags, etc.
- Maintain enhanced cleaning and disinfecting schedule
- Place hand sanitizer and/or disinfectant near throughout common areas
- Sanitize all workpiece areas such as office, conference rooms, breakrooms, restrooms and lobbies
- Clean work products from approved use from generating activities
- Pour 2 cups of water down each sink and flush down to sink at end work days. If possible unnecessary sinks and drain access to sewer systems

Remember these ways to stay healthy as outlined by the CDC:

- Wash your hands often
- Avoid close contact with people who are sick
- Cover your mouth and nose with a cloth face cover when around others
- Clean coughs and sneezes
- Clean and disinfect frequently touched surfaces daily

Don't forget to wash your hands often!

Cleaning services provided by independently owned and operated JAN-PRO cleaning franchisees.
