WHY PAUL DAVIS?

Paul Davis provides property reconstruction and loss solutions that have redefined the industry. We have a proud history of innovation, including inventing the insurance restoration contractor category and the first network to partner with the insurance industry. We specialize in restoration services for residential and commercial properties and contents damaged by storms, water, fire, smoke, mold, and other disasters. Paul Davis brings a full range of expertise to all types of losses with just one phone call.

- 24/7 emergency services
- Guaranteed 30-minute call back
- Complete mitigation services
- Emergency board-up and stabilization
- Restoration and reconstruction services
- Mold remediation and prevention
- CSI warranted work
- IICRC certified representatives
- Unbiased, third party measurement of quality and customer satisfaction

When your customers experience an insurance loss to their property, it pays to call the experts at Paul Davis.

FIRE DAMAGE RESTORATION SERVICES

At Paul Davis, fire damage restoration is one of our core services. For fifty years, we have restored residential and commercial properties damaged by structure fires and the water used in firefighting efforts. Why is Paul Davis the restoration contractor of choice for fire damage mitigation and restoration?

WE PROVIDE:

- 24/7 Emergency Response
- On Site Assistance Within 2 Hours
- Emergency Board-up & Structural Stabilization
- Soot and Residue Removal
- Smoke Odor Removal
- Water Cleanup and Structural Drying
- Mold Remediation
- Debris Removal
- Full Service Contents Cleaning & Restoration
- Complete Documentation as Required

BENEFITS TO YOU:

- No need to manage multiple contractors
- Repairs done according to IICRC Guidelines
- Familiarity with the claims process- faster claims resolution
- Satisfied Customers

We also work with the local fire and law enforcement departments to preserve, protect and secure the property from further damage, which could mean additional cost savings to you.

BENEFITS TO YOUR POLICYHOLDERS:

- Work can begin without delay
- Insurance claims assistance
- Personal belongings may be restored
- Reassurance during a difficult time

Find out for yourself how Paul Davis can make a difference for both you and your customers.

Recovering from fire damage is a complex process. Paul Davis understands the effects of fire, smoke and soot on building materials, contents and personal possessions – and the importance of beginning the repair process without delay. You can rest assured that we have the training and experience to employ the appropriate methods to clean up and repair the damage and return the property to its preloss condition quickly and cost-effectively.

COMPLETE WATER DAMAGE SOLUTION

When your insurance customers' property is damaged by water – whether from a burst pipe, flooding, storms, sprinkler deployment, or other cause – Paul Davis is the restoration company to call. **Why Paul Davis?**

- 24/7 Emergency Response
- Guaranteed Contact Within 30 Minutes
- Loss Containment
- Water Extraction
- Applied Structural Drying (ASD)
- Mold Remediation
- Complete Restoration Services
- Reconstruction Services
- Full Service Contents Cleaning & Restoration
- The IICRC Certified Technicians
- State-of-the-art Processes
- Commercial and Residential Services
- Outstanding Customer Service.

Benefits to you:

- Cost savings
- Improved productivity
- Complete documentation to help you close claims faster
- Satisfied customers

Benefits to your policyholders:

- Fast response
- Less disruption
- Quality repairs
- Insurance claims assistance

All Paul Davis offices are certified in Applied Structural Drying (ASD). ASD maximizes the removal of water from building materials using scientific methods and specialized equipment. This approach uses the proper combination of air movement, temperature control, humidity control and dehumidification to quickly remove moisture with little disturbance to the structure or contents. ASD allows us to save building materials (including drywall, carpets and padding) and, in most cases, dry affected areas in as few as 3 days.
